Heaven on earth

Explore the practical possibilities

Newton Abbot, Devon: Most people probably agree that heaven represents a really good state of affairs, but that all too often earth seems very far from heaven. National speaker, Daniel Scott says, "Wouldn't we all like to see more harmony expressed in our families, communities, and the world? My lecture offers a practical, powerful, and spiritual approach to improving the human condition as well as some thought-provoking ideas on the nature of heaven."

Daniel Scott, a member of the Christian Science Board of Lectureship, presents a talk "Heaven on Earth" on Saturday, 5th July, 2008, Room 1, 2.00pm at The Quest Natural Health Show, Newton Abbot Racecourse, Devon TQ12 3AF. Health Show admission is £8.00.

During this talk Scott explores a more spiritual approach to heaven, explaining how the health and harmony we associate with heaven can be experienced more fully here and now. Scott's ideas are based on the Bible and the book *Science and Health with Key to the Scriptures* by Mary Baker Eddy, which brings out the scientific, timeless, and universal nature of Christianity.

During this talk audiences will:

- Learn that there is a spiritually scientific basis to Christ Jesus' teaching that 'the kingdom of heaven is at hand'.
- Explore practical ideas that everyone can utilise to bring more harmony into their experience, and that can strengthen our prayers for the world.
- Find inspiration and help through real-life stories of clear-cut healing.

Daniel Scott spent seven years at Cambridge University gaining a MA in mathematics and a PhD in mathematical physics. Since 1998 Scott has been working full time as a practitioner of Christian Science healing. His speaking engagements have included schools, universities, youth, church and interfaith groups. Scott travels from his home in Scarborough presenting talks around the UK.
